

# **Why wait?** **Covid** **doesn't.**

**Catching COVID-19 during your pregnancy poses risks to mum and baby, especially where women are unvaccinated.**

**Get the vaccine now.**

# Why wait? Covid doesn't.

The COVID vaccine has been shown to be safe at any stage during pregnancy, and many thousands of pregnant women across the country have already been vaccinated.

Whether you still require a booster or whether you haven't yet been vaccinated at all, book your appointment now or visit a local drop-in clinic.
