Recruiting now for
focus group members

As part of the on-going development of NHS Fife's new strategy we are looking to recruit a representative sample of the population of Fife to take part in one of our 13 facilitated focus groups to allow us to explore in more detail the themes identified in last year's community conversation survey.

The 90 minute focus group sessions are scheduled to run from **19-30 September 2022**.

To help identify volunteers we are asking interested members of the public to take a few minutes to complete a short selection questionnaire. If successful applicants will be contacted directly no later than the week beginning **12th of September 2022** with more information on session dates and timings.

The closing date for applications is 5pm on **Sunday 11 September 2022**.

This research will be conducted by Progressive, an independent research company.

We have created a dedicated webpage: www.nhsfife.org/conversation

with information on community conversation work to date and how to apply to participate in a local focus group.

NHS Fife is asking our partners to help spread the word and share this PDF and website link via your own communications and social media channels to encourage participation in this next phase of public engagement in the development of NHS Fife's new strategy.

Thank you.
