

Health Care Information

Welcome to Fife

Arrangements have been made to ensure that essential and emergency health care is provided for you and your family on arrival and in the first few weeks of your stay.

If you are unwell and need urgent health care there are staff in the hotel 24 hours who will help you access health care services.
For example, doctor, nurse, dentist, pharmacist.

In the first few days at the hotel, health care staff will be meeting you, and organising health appointments for you. It is important that people who have a health condition, need medication, are pregnant, or have young children are seen by nursing staff at the hotel as soon as possible.

Everyone will be given a time and date to attend a local health centre in the first week or two, where you will meet and register with a doctor and some basic health care checks will be carried out.

Transport and interpreting services will be arranged for you.

Over the next week you will receive more information on health care services.
